Education

Vellore Institute of Technology — 2023 – 2027
Bachelor of Technology in Electronics and Communication Engineering; CGPA:8.48 — *Bhopal, India*

Skill Set

Languages: Java, Python
Frameworks: MERN Stack, GitHub
Databases: MySQL, MongoDB

Internship

MPOnline (Government of MP) | *AI/ML & Advanced Software Engineering Internship* — May 2026 – Jul 2026

-Built ML models (regression, classification, decision trees, random forest, SVM, clustering, PCA) using Python, NumPy, Pandas, and Scikit-learn, and developed neural networks with TensorFlow/PyTorch for computer vision and NLP.
-Practiced full-stack SDLC: DBMS, SQL, OOP, Git/GitHub, and CRUD app development, followed by requirement analysis, system design, backend development, testing, and cloud deployment for a capstone project.

Projects

Vital Vision | *NLP, MERN Stack, Python* — https://tinyurl.com/vitalviprojp

-Developed an AI-powered medical chatbot that analyzes user-reported symptoms and prioritizes triage responses to help patients access appropriate care faster.
-Implemented NLP for symptom analysis, the MERN Stack for the web application, and a Python backend integrated with a Geolocation API for real-time appointment booking.
-Explored intent-classification and symptom-severity triage techniques to improve the accuracy and reliability of chatbot recommendations.

OralCancer MedTech | *Deep Learning, Django, React Native* — https://tinyurl.com/CancerTech

-Designed a mobile-based screening tool for early-stage oral cancer detection to improve accessibility to preliminary diagnosis.
-Engineered a CNN-based Deep Learning model, React Native for the cross-platform mobile app, and a Django REST API backend.
-Investigated CNN architectures and data augmentation strategies to achieve 97.8% detection accuracy.

Smart Surveillance for Public Transport | *Computer Vision, AI*

-Created a real-time monitoring system for public transport to detect anomalies and enhance passenger safety.
-Leveraged OpenCV and YOLO for real-time object detection and video analysis.
-Analyzed anomaly-detection models and optimized YOLO inference for real-time performance on live video feeds.

Certifications

Applied Machine Learning in Python – Coursera (University of Michigan) — https://tinyurl.com/AppMLearning

Intro to Machine Learning – Kaggle — https://tinyurl.com/MLCKaggle

Health Hackathon 2026 – Finalist — https://tinyurl.com/HealthHack26

Health Hackathon 2025 – Finalist — https://tinyurl.com/HealthHack25

Extracurricular

Languages: Proficient in English, Hindi; learning Japanese and German (250+ day Duolingo streak). — https://tinyurl.com/DuolingoStreak

Leadership: Student Partner at IEEE and VITronix Club, organizing technical workshops for 1000+ students.

National Service Scheme: Served as Hospitality Lead for the NSS Unit Camp and led the Tree Plantation Drive team.

Hobbies

Anchoring, Dancing, Event Management, Photography, Public Speaking.
